

SHEARCORE™

THE NEW WORLD STANDARD

SHEARCORE.COM

SHEARCORE
AN EXODUS GLOBAL COMPANY

ShearCore is part of a group of companies operated by Exodus Global (formerly Exodus Machines), a privately held, local family business. With strong ties to Superior, WI, Exodus Global has invested in state-of-the-art equipment and a world class manufacturing facility.

Established in 2014, ShearCore has experienced incredible growth and penetration in scrap, recycling, and demolition industries. Considering the well-established competitive landscape, this was no easy task!

Fortunately, it was a road well-traveled for the founding President, Bruce Bacon. Bruce's roots and reputation in the industry allowed our customers to take a risk on a small start-up, and when they did, boy were they impressed!

We always knew the time would come for Bruce to transition to a well-deserved retirement and we have assembled a "dream-team" of sorts across all disciplines. Almost a century of experience in the scrap, recycling and demolition industries are represented in the people below.

- Jim Campbell, VP of Operations
- Rich Currie, VP of Sales
- Jim Bendas, VP of Finance
- Adam Bennis, VP of Engineering
- Brian Hawn, VP of Service

I could not be more confident in the future of ShearCore and the other companies owned by Exodus Global - BladeCore, Connect Work Tools, and OilQuick Americas.

Our passion to service this industry runs deep, our commitment to quality and customer service even deeper, yet neither reach the level of appreciation we have for our employees. We could not do what we do without their skill, dedication, work ethic, and talent.

I am humbled and privileged to sit in the chair I do and with that comes a responsibility. My commitment to our customers, vendors and employees is to operate this company with integrity and passion. Oh, and one more thing, we are going to have fun along the way!

Kevin Boreen - CEO

FORTRESS™

MADE IN THE USA

WHERE WOULD CLASS EQUIPMENT ...

The approach to the Fortress design is simple - increased power and performance - manufactured to last longer. With our strong engineering and manufacturing background, we have created a line of attachments that are more powerful and structurally sound.

All Fortress mobile and demolition shears are designed and manufactured at our factory located on the western tip of Lake Superior in Superior, Wisconsin.

Our 90,000 square foot manufacturing and warehouse facility houses 5 state-of-the-art milling centers, a full parts department, a rebuild center, and the best manufacturing team.

Fortress has quickly become the new world standard in demolition and scrap recycling attachments, earning a reputation for innovative design, world-renowned engineering, and world-class manufacturing, backed by an experienced service team that assists in decreasing down-time.

When you buy a Fortress attachment you become part of the Fortress Family. We take pride in our products by providing world-class service and support.

A team of knowledgeable Fortress field technicians are available when needed for on-site highly technical support and training requests.

In the effort to quickly respond to your installation, service, and parts needs, our factory support team is always available.

Contact our service team at 1-715-395-5810 or service@ShearCore.com.

Tours available anytime!

**...MEETS WORLD CLASS
COMMITMENT**

FORTRESS™

UNMATCHED POWER TO WEIGHT

Fortress Mobile Shears are designed and manufactured to cut more, last longer, and are easier to maintain. The shears are purpose built for scrap metal processing, demolition, and demolition/reconstruction.

What sets Fortress apart from our competition? In a word, "power." Hydraulic and geometric perfection have been blended to create a shear that is unmatched in real-world capability.

More power requires more strength and rigidity. Our unique machining capabilities allow us to utilize 6" high-yield plate and use fewer overall components. Fewer components mean less welds for a structurally superior shear.

FS MOBILE SHEARS

Fortress mobile shears can be installed on a variety of carriers; everything from smaller excavators up to massive high reach machines. All shears are rated for up to 5500 psi.

Our factory experts will work directly with your excavator manufacturer and/or your local equipment dealer to ensure maximum performance.

SHEAR SPECIFICATIONS

Model	Shear Weight (kg.)	Jaw Opening (mm.)	Jaw Depth (mm.)	Reach (mm)	Minimum Excavator Boom Mount (ton)	Minimum Excavator Stick Mount (ton)
FS25R	2,676	584	483	2,642	14	20
FS35R	3,266	660	584	2,870	18	30
FS45R	5,080	711	711	3,251	23	41
FS55R	5,897	762	762	3,556	26	50
FS75R	7,121	813	813	3,658	34	58
FS85R	7,938	889	965	4,064	37	75
FS95R	9,798	991	1,067	4,140	48	84
FS145R	12,973	1,092	1,168	4,369	66	113

Models listed are rotating shears. Non-rotating models are available in FS45-FS145.
Weights may vary depending on configuration options.
FS25-FS35 listed weight is typical 3rd member universal. FS45-FS145 is typical 2nd member mount.

FORTRESS™

PRIMARY DEMOLITION REDEFINED

The Fortress Demolition Shear is a very powerful attachment purpose built for crushing and processing concrete in both primary and secondary demolition. The FC offers unmatched power all the way out to the tip.

Why call it a Demolition Shear? The Fortress FC is a new class of tool with unique construction and capabilities. It utilizes a solid upper with no welds and press-fit pivot group (like our shears) allowing for tolerances tight enough to shear rebar all the way out to the tip.

FC DEMOLITION SHEARS

The FC can be installed on a variety of carriers; everything from smaller excavators up to massive high reach demo machines. Demolition shears are rated for up to 5500 psi.

Our factory experts will work directly with your excavator manufacturer and/or your local equipment dealer to ensure maximum performance.

DEMOLITION SHEAR SPECIFICATIONS

Model	Shear Weight (kg.)	Jaw Opening (mm.)	Jaw Depth (mm.)	Reach (mm.)	Minimum Excavator 2nd Member Mount (Metric Tons)	Minimum Excavator 3rd Member Mount (Metric Tons)
FC25	2,767	813	772	2,235	14	20
FC35	3,946	1,067	960	2,845	18	30
FC45	4,627	1,336	1,105	3,146	27	41

Weights may vary depending on configuration options. Listed weight is typical flat top without bracket.

RECONDITIONING DEPARTMENT

A NEW LIFE

Let's give your shear a new life. **ShearCore** is a leader in the reconditioning of hydraulic shears. With decades of experience across all major brands and unique machining capabilities at our facility in Superior, WI, ShearCore is the best choice to breathe new life into your shear.

All projects are firm quoted after inspection, so no surprises. We use only the highest quality steel and components in rebuild and warranty our work for up to 6 months.

A typical reconditioning includes:

- Inspection of shear
- Repair any structural cracks to stick body
- Replace chin plate and square lower jaw
- Rebuild major hydraulic components
- Replace upper and pivot assembly
- Install cutting blades
- Pressure test
- Paint and decal

ShearCore also supplies replacement uppers and pivot kits for major shear brands.

Our replacement uppers are machined from a single piece of 6" high-yield steel.

Contact us for a quote today.

MADE TO WORK

BladeCore, also an Exodus Global company, offers top quality replacement blades for mobile and stationary shears as well as direct sales and service support for the Fortress shear and other leading shears in scrap and demolition.

BladeCore blades are proven to be the best in the industry. With the experience we have producing blades for this market, we've partnered with some of the best manufacturers in the world and offer our premium blade series which outlasts the competition by about 20%. Our specialized "NiCore" blade series outperforms a typical blade by 60-80% and is perfect for those really tough applications like rebar, stainless steel, and cable.

NiCore blades will redefine blade life expectations in the scrap metal and demo industries.

BladeCore also redefines customer service in the scrap and demolition industries. We have a group of dedicated blade professionals with one thing on their mind - your blades! We're experts in the blade type that would work best in your specific application and can make recommendations that will reduce your cost of production.

Your sales representative will be your exclusive contact for everything you need. Shoot us a text, an email, send us a DM on Instagram, or give us a call. We're here to compliment what works best for you and we'll be there when you need us, whether it's about blades...or anything else!
