

EXB-HDINT INTEGRATED THUMB TRENCHING BUCKET

*Attachments depicted may include optional paint, upgrades, or custom configurations.

The Craig Integrated Thumb Trenching Bucket is based on our Direct Link Hydraulic Link Thumb (EX-CUT) and Heavy Duty Trenching Bucket (EXB-HD). Hanging the thumb from the bucket rather than the stick pin allows the excavator to completely free itself from the bucket and thumb in just seconds. The thumb cylinder is intended to be removed from the excavator stick, allowing for maximum operator visibility when using other attachments.

- Available in Wedge Lock lugging or Craig TrueGrip pin grabber
- Pre-drilled for side cutters and wear shrouds
- Various ground engaging tools available to meet your specifications
- Enclosed lift ring standard
- Thumb has up to 120° of gripping rotation
- Thumb and bucket teeth intermesh
