

EXB-S SAND BUCKET

The excavator sand bucket has a scoop shape with a flat bottom to sit on the ground for easy attachment while the shape is perfect for scooping materials like sand and fine gravel.

- Reduced surface area and lack of GET allows for easy penetration through for soils
- Flat BTM design allows for detailed grading during pipe laying operators
- Open top prevents soils from “air locking” and suctioning to inside of bucket
- Bolt on edge (optional)
